Table of contents

No. 1 1—136 issued on December 13, 1985
No. 2 137—284 issued on February 14, 1986
No. 3 285—394 issued on April 10, 1986

Akin, E., see Cressman, R., et al. 221
Alexander, J. C.: Spontaneous oscillations in two 2-component cells coupled by diffusion 205
Andrietti, F.: Two-dimensional standing gradient osmotic flow: a generalization of the „isotonic convection approximation" 305
Asmussen, M. A.: The dynamics of interlocus associations in the three locus hitchhiking model. 1. The three-way linkage disequilibrium function 285
Baer, S. M., Tier, C.: An analysis of a dendritic neuron model with an active membrane site 137
Bertsch, M., Gurtin, M. E., Hilhorst, D., Peletier, L. A.: On interacting populations that disperse to avoid crowding: preservation of segregation 1
Brokate, M.:Pontryagin's principle for control problems in age-dependent population dynamics 75
Bušenberg, S., Mahaffy, J.: Interaction of spatial diffusion and delays in models of genetic control by repression (Erratum) 283
Coutsias, E. A., see Perelson, A. S. 361
Cressman, R., Dash, A. T., Akin, E.: Evolutionary games and two species population dynamics 221
Cushing, J. M.: Equilibria in structured populations 15
Dash, A. T., see Cressman, R., et al. 221
Donnelly, P.: Dual processes and an invariance result for exchangeable models in population genetics 103
Ermentrout, G. B.: The behavior of rings of coupled oscillators 55
Grindrod, P., Sleeman, B. D.: A model of a myelinated nerve axon: threshold behaviour and propagation 119
Gurtin, M. E., see Bertsch, M., et al. 1
Hannsgen, K. B., see Tyson, J. J. 231
Hilhorst, D., see Bertsch, M., et al. 1
Hofbauer, J.: The selection mutation equation 41
Iwasa, Y., see Liu, W., et al. 187
Kooijman, S. A. L. M.: What the hen can tell about her eggs: egg development on the basis of energy budgets 163
Levin, S. A., see Liu, W., et al. 187
Liu, W., Levin, S. A., Iwasa, Y.: Influence of nonlinear incidence rates upon the behavior of *SIRS* epidemiological models 187
Mahaffy, J., see Busenberg, S. 283

Peletier, L. A., see Bertsch, M., et al. 1
Perelson, A. S., Coutsias, E. A.: A moving boundary model of acrosomal elongation 361
Plant, R. E., Wilson, L. T.: Models for age structured populations with distributed maturation rates 247
Radcliffe, J., Rass, L.: The asymptotic speed of propagation of the deterministic non-reducible *n*-type epidemic 341
Rass, L., see Radcliffe, J. 341
Rogers, T. D., Yang, Z., Yip, L.: Complete chaos in a simple epidemiological model 263
Scalia-Tomba, G.: The asymptotic final size distribution of reducible multitype Reed—Frost processes 381
Sleeman, B. D., see Grindrod, P. 119
Tang, B.: Mathematical investigations of growth of microorganisms in the gradostat 319
Tier, C., see Baer, S. M. 137
Tyson, J. J., Hannsgen, K. B.: Cell growth and division: a deterministic/probabilistic model of the cell cycle 231
Webb, G. F.: A model of proliferating cell populations with inherited cycle length 269
Wilson, L. T., see Plant, R. E. 247
Yang, Z., see Rogers, T. D., et al. 263
Yip, L., see Rogers, T. D., et al. 263
